

The big Year 7 move in 2020

Director of Learning Andrea Sherwood and new Head of Year 7 Jane Edwards, here with students entering Year 7 in 2020.

It is an exciting time at Westminster School with Year 7 moving formally into the Senior School from 2020.

This change on campus aligns with the opening of the School's new Inquiry and Innovation Hub, which will consolidate Science, IT, Design, Engineering, Food Technology, including a VET Kitchen, Fashion and Textiles in a three-storey resource centre.

The new Year 7 learning program is shaping up to be particularly inspiring for students who will benefit from the innovative approach to curriculum delivery.

In addition to a broad range of compulsory subjects, the

updated timetable includes dedicated lessons to further challenge and develop students' critical and creative thinking skills. The Director of Learning, Andrea Sherwood, explains: "The aim is to arm students with the competencies and capabilities required for life-long learning. We want our students to take responsible risks, develop a robust approach to problem solving and graduate with a wonderful sense of connection to the community in which they live." Under the care and guidance of a new Head of Year 7, Jane Edwards, Westminster students can look forward to learning from highly qualified subject spe-

cialists, many of whom have contributed significantly to the national development of their respective curriculums.

Throughout this process of change, the School remains firmly committed to providing all students with an excep-

tional education as they are best prepared to understand and respond to incredible opportunities in a changing world.
